30-a. Special cases may arise in which the literal enforcement of a rule may impose unnecessary hardship. The Association, therefore, reserves the right, without notice, to make exceptions, suspensions or modifications in any of these rules and regulations when, in its sole judgment, the same appear advisable; and such temporary exception, suspension, or modification shall in no way be construed as affecting the general application of such rule.

30-b. The Board of Trustees of the Association hereby expressly reserves the right at any time or times, and from time to time, to adopt new rules and regulations, or to amend, alter or repeal any rule or regulation, or any article, section, paragraph, sentence, word, or any other part of these rules and regulations.

**EMERALD MEADOWS
GREEN BURIAL**

ADDENDUM TO

The following Rules and Regulations are specific to the Emerald Meadows Burial Section only, located on the Southwest corner of the North Lawn Cemetery property. This section is restricted to natural burial and is prohibited to be used for conventional burial.

1 DEFINITIONS

Additional Interment Right – Each owner has a right to be buried in the grave purchased. In order to inter additional human cremated remains, an additional interment right must be purchased.

Biodegradable – Biodegradable materials are generally organic materials such as plant and animal matter and other substances originating from living organisms, or artificial materials that are similar enough to plant and animal matter to be put to use by microorganisms to produce decomposition of the materials when buried in the ground.

Casket – a rigid receptacle in which a deceased human is brought to the cemetery for burial made of biodegradable materials.

Contractor – any person, firm or corporation engaged in setting any memorial, digging graves or performing any other work on the cemetery grounds, other than an employee of the cemetery.

Green Burial or Natural Burial - The exclusive Burial practice of the Cemetery that requires all of the following

- a. Interred bodies must either have not been embalmed or were embalmed with non-toxic chemicals, i.e. pose no threat to either human life or the environment.
- b. Prohibits the use of Outer Burial Containers (partial, inverted or otherwise) manufactured of any material (e.g. concrete, plastic, metal), concrete lids, concrete boxes, slabs or partitioned liners.
- c. Burial containers (caskets, shrouds, etc.) must be made entirely from natural/plant derived materials.
- d. All materials interred with the bodies must be Biodegradable except for nontoxic jewelry.

Memorial – a grave marker identifying a grave or graves.

Natural Burial Ground – According to the requirements of the Green Burial Council (GBC) for designation as a “Natural Burial Ground”, a Cemetery must...

- a. Require practices that are non-toxic and energy-conserving.
- b. Prohibit the use of vaults, (partial, inverted or otherwise), vault lids, concrete boxes, slabs or partitioned liners.
- c. Prohibit the Burial of decedents embalmed with toxic chemicals.

- e. Be designed and operated to produce a naturalistic appearance compatible with regional ecosystems.
- f. Limit the types, sizes, and visibility of Memorial markers to preserve naturalistic vistas.
- g. May or may not be part of an ecological restoration.

Perpetual Care – See 8 Perpetual Care.

Shroud – A Burial cloth made of natural material in which a deceased human will be buried.

2 PURCHASES OF RIGHTS OF INTERMENT

2-a. Rights of interment and inurnment may be purchased from any authorized sales agent of the Association.

2-b. Additional Interments – In order to inter additional human remains in a grave purchased with a single interment right, an additional interment right must be purchased. These additional interment rights must be for cremated remains only. Only one additional interment right per grave space is permitted.

2-c. North Lawn Cemetery – Emerald Meadows – Natural Burial Grounds will have lots that measure 4 feet x 8 feet and are suitable for the interment of one casket, one casket and one cremated remains, or two cremated remains.

2-d. Graves are 3.5 feet deep. Since vaults are not used the soil is mounded over the grave. It is usually level again in about a year. This depth ensures that remains are undisturbed and return quickly to nature. Organic material such as leaves and twigs may be mixed with soil when graves are closed to facilitate site restoration.

2-e. Interment shall be only in or with naturally Biodegradable materials. Metals, plastics, concrete, synthetic materials or large pieces of stone may not be included in an interment. The cemetery may, at its discretion, or on a case-by-case basis, allow personal jewelry to be interred.

2-f. Remains that are embalmed or otherwise chemically preserved with substances that are not approved by the Green Burial Council may not be interred in the Emerald Meadows section.

2-g. No hand digging of a grave by family members will be permitted. Hand digging of a grave can be purchased and completed by cemetery approved skilled labor, weather permitting. Families are welcome to close the grave. Families who have closed graves have found it to be a powerful experience. The cemetery will be on hand to quietly supervise a closing.

2-h. Due to the Biodegradable materials used in this section, the cemetery cannot allow any disinterment to take place in the Natural Burial Section.
